

Compliant design in accordance with current standards

Metallurgy
& Mining

Upon request, we design and build our systems in accordance with applicable technical guidelines and testing standards – to ensure maximum quality assurance and documentation. These include, among others:

VDMA Guideline	Verification of manufacturer's specifications
DIN ISO 9001-9004	Quality management certification
DIN EN ISO 3834-2	Welding qualification
DIN EN 1593	Pressure and leak testing
EN ISO 17640	Ultrasonic testing
EN ISO 23277-2	Dye penetrant testing (DPT)
EN ISO 23278-2	Magnetic particle testing
DIN EN ISO 6506, 6507, 6508	Hardness testing
EN ISO 23278-2	Coating testing
DIN ISO 21940-11 G 2,5	Balancing test
VDI 2044	Performance and characteristic curve measurement

Additional relevant standards available upon request.
